Bashaw—Evening 7:30 p.m.

For the third year a succession of the McAdam First Aid Team from New Brunswick carried off the "Grand Challenge Trophy," emblematic of the eastern lines first aid championship of the Canadian Pacific Railway. The competition was held recently at the Place Vigor Hotel in Montreal, four other teams from points east of Fort William competing.

The oldest employee of the Canadian Pacific Railway in point of service, Isaac Gouverneur Ogden, vice-president in charge of finance, celebrated his 82nd birthday October 10th. He has served the Company for 44 years and his business experience goes back to the Civil War days. Mr. Ogden was the recipient of felicitations from all parts of the Dominion.

General Booth, head of the Salvation Army, sailed recently from Vancouver on the Canadian Pacific liner Empress of Canada for Japan. The General will tour Japan, China and Korea. True to his maxim of not touching feed for two days previous to a sea voyage, the General contented himself with sipping a little hot water while attending to his correspondence and waiting for the liner to sail.

Toronto—The New York Times is about to invest \$25,000,000 in northern Ontario for the production of all of its newspaper—about 550 tons a day. The announcement of this project was made by the secretary of the president, Adolf Ochs, during the sojourn of both in this city. The site selected for the paper plant is at Kapuskasing where there is already a small sulphite mill in operation. The water power, 75,000 h.p., will be generated from Smoky Falls.

Thirty students from Oxford and Wyer Agricultural College, Kent, England, returned home on the Canadian Pacific liner Montclair recently after having assisted in the harvesting of the Saskatchewan crop. These young men were brought out to the Dominion by the Department of Colonization and Employment of the Canadian Pacific Railway, and placed on selected Saskatchewan farms by the Women's British Immigration League. The students are returning their dues in England this fall.

Just prior to going to press fire broke out in the Mirror Town Hall, completely destroying the bank, law office and building.

Mirror School is Damaged by Fire

On Friday morning last fire broke out in the basement of the school shortly after 11 a.m. The school at the time was closed on account of the convention in Carleton Place. It was extinguished without much damage. Shortly after midnight it broke out afresh, and before extinguished had ruined some of the floors and the furnace. How the fire originated is a mystery, but it is thought that it was caused by spontaneous combustion. The building carried insurance.

Alberta has one of the most wonderful wild game hinterland in North America, according to Adolph Muller, of Norristown, Pa., game commissioner of the State. He expressed this opinion after spending a month in the interior of the province, exploring and taking motion pictures, including some of caribou on the track.

Two brothers, George and Edward Hume, of Manor, Saskatchewan, carried off the Canadian Pacific Railway and the Dominion Livestock Board awards in the recent pig clubs competition conducted by the Extension Department of the University of Saskatchewan at Saskatoon. Teams from all parts of Saskatchewan competed.

Fredericton, New Brunswick.—A moose with antlers spreading 64 inches was shot in the New Brunswick woods by William Proudfoot of Doherty Ferry, New York, while a companion of his, F. C. Chesbrough, of New York City, brought down a lordly animal with an antler spread of 57 inches. Mr. Proudfoot's trophy creates a record for the season.

Vice-Admiral Sir Walter Cowan K.C.B., of two visiting British cruisers to Philadelphia Navy Yard recently, was one of the most enthusiastic passengers on the Canadian Pacific's miniature trials at Treasure Island, the C.P.R.'s exhibit at the Sesqui-Centennial Exposition in Philadelphia. The Admiral thoroughly enjoyed the ten-minute "Transcontinental" journey from Quebec to Vancouver.

Simple Mixture Stops Gas Bloating

Simple buckthorn bark, glycerine, etc., as mixed in Adierika, often helps stomach trouble in TEN minutes by removing GAS. Brings out a surprising amount of old waste matter you never thought was in your system. Stops that full, bloated feeling and makes you enjoy eating. Excellent for chronic constipation. Adierika works QUICK and delightfully easy. Devereaux Drug Co.

Canadian National Railways

RE-ROSE "is good COFFEE"

World Benefactors

In one of his famous satires, Dean Swift makes the king of Froblungus give utterance to the aphorism that whoever could make two ears of corn or two blades of grass to grow upon a spot of ground where only one grew before, would deserve better of mankind and do more essential service to his country than the whole race of politicians put together.

Certain it is that while many politicians have done an immense amount of good in this world, many others have done incalculable harm, but the experimenters and scientists who have carried out the dictum of Dean Swift's imaginary king have conferred nothing but good upon mankind.

In April last the death occurred of Luther Burbank, of California, popularly known as the plant wizard, at the ripe old age of 77 years. Mr. Burbank devoted his life to the breeding of plants, and the results of his remarkable experiments in the development of flowers, fruits and plants of all kinds are too well known to require more telling. He gave added size and beauty to flowers and developed many new types; he increased the size and flavor of many fruits; he increased the productive power of many plants and trees many times over. He thus added not only to the beauty of the world, but to the fruit grower, the wealth of the world, and the health of people generally.

Canada, too, has its plant wizard in the person of Dr. Saunders, the creator of Marquis wheat. About twenty-five years ago Dr. Saunders, after long and painstaking experiments succeeded in crossing a harvest of wheat from the shores of the Baltic with another kernel of wheat from the foothills of the Himalayas and thereby created a new type which produced a larger yield per acre, made a whiter flour, and ripened in less time and thus avoided damage from frost. This new wheat was named Marquis, and from the one kernel of only about twenty-five years ago, there is now harvested around four hundred million bushels annually. Dr. Saunders' work has meant hundreds of millions of dollars to Canada within the life of the present generation.

Western Canada can also boast of its experimenters through whose efforts several blades of grass, or wheat, have been made to grow where only one grew before. The name of S. Wheeler is a household word in the farm homes of this country. He has shown how the finest wheat in the world, the wheat which year after year captured the world's first prize, can be grown. He has demonstrated the methods to be followed, and has proven how profitable good farming and proper cultivation and seed selection is as compared with careless and indifferent cultivation, the use of poor seed and poor farming in general. S. Wheeler is now engaged in demonstrating that apples, pears, plums and other fruits can be successfully grown on the prairies of Western Canada.

Politicians have a word of importance to do for the country, and in the doing of it honestly, faithfully, and well they are deserving of all honor and loyal support, but men like Burbank, Saunders, Wheeler, and others whose names are not so well known but who are quietly raising the standard of production, are likewise deserving of all honor and loyal support.

The world heaps honors and riches on the successful politician, manufacturer, financier, and business man. Too frequently, though, the quiet man of work in his garden, field or laboratory, working out through years of study and experimentation, difficult problems whose solution blesses all mankind, remains unrecognized and without reward. It is gratifying, therefore, to learn that a body has been created with strong financial backing to carry on the work to which Luther Burbank devoted the best years of his life; that the Dominion Government has recognized Dr. Saunders' invaluable research work by granting him an annuity of some thousands of dollars for life; that leaders in all walks and professions in life have united in doing honor to S. Wheeler.

Over and above the material achievements of these really great men, and the direct benefits they have conferred on the world, there is the example of such lives and the incentive they give to others to strive mightily for greater, better things. The individual farmer who is earnestly striving to make his farm a model for the community in which he lives, who wears unassuming fare on weeds, who gives close attention to the cultivation of his soil, insists on good, clean seed, who eliminates scrub from his herds and houses his cattle in clean and sanitary buildings, or the farm wife who takes a pride in her poultry, in the quality of the milk and cream sent to the creamery, or the butter she herself may make, are likewise doing essential service to their country and are deserving of the thanks of their fellow citizens.

Wants Lost Colonies Returned Germany's Desire is Creating a Grave Problem for League

Germany's known desire to get back at least one of her many colonies which she lost as a result of the world war is a grave problem which is now confronting the League of Nations. The problem is felt here to be all the more grave because no light is seen as to how the question is to be solved.

Germany hopes that perhaps she will be able to get satisfaction through private conversations with representatives of the other powers, and has already taken the matter up at the post luncheon party at Theby between Foreign Minister Briand of France, Foreign Minister Stresemann of Germany.

Children Cry for

Fletcher's CASTOR OIL

MOTHER—Fletcher's Castor Oil is a pleasant, harmless Substitute for Castor Oil, Paregoric, Teething Drops and Soothing Syrups, especially prepared for Infants in arms and Children all ages.

Wonder Of Modern Surgery

Blood Transfusion Possible Without Attendance of Giver

London doctors have discovered that transfusion of blood can be made without the attendance of the giver of the blood alongside the patient receiving it. A pint and a half of blood taken from a person in Faddington was raced through London to a patient at Richmond in Surrey and successfully transfused.

This wonder of modern surgery was done with the aid of a motor car and a new medical invention enabling the blood to be kept in perfect condition and at the necessary temperature during the journey.

Work Fits League

The League of Nations, with its associate organizations, are world wide and not European institutions. I. B. Butler, deputy head of the International Labor Office, told the Canadian Club at Ottawa. The league itself was kind of fire brigade and naturally did not expand its efforts upon structures which were not its flame. Its work was where structures were smouldering and during the past seven years Europe had been the scene of most of its activities.

Relieves Catarrh Almost Instantly!

Nasal catarrh clogged nostrils, obstructed breathing, caused colds, dull headaches, heavy eyelids, and interfered with the normal functions of the body. The amazing power of **Dr. Williams' Pink Pills** to relieve this condition is well known. It is a most delicate disease, but powerful enough to break in concentrated relief. It is a most delicate disease, but powerful enough to break in concentrated relief. It is a most delicate disease, but powerful enough to break in concentrated relief.

Million Dollar Paper Mill
A million dollar mill is to be erected on the Fraser property, immediately outside Aymer, Que., presumably by the International Paper Company, states the Ottawa Journal.

Greyhounds are supposed to be the oldest breed of dogs in the world. They have been traced back for thousands of years. Their figures are found on Egyptian frescoes, and history records that they were used for coursing by Xenophon.

Nurse's Advice

Brooklyn. Mrs. Minnie Penrose writes me: "My little boy, who is now 10 months old, has been suffering from a severe case of colic for some time. I have tried everything I could think of, but nothing has helped him. I have heard of your Little Liver Pills, and I have bought a box. I have given him a few, and he is now perfectly well. I am sure that your Little Liver Pills are the best for children." **Druggists: 25¢ and 75¢ red packages.**

There was a slight difference of opinion. He acknowledged his mistake quite generously by saying: "You are right, and I am wrong, as you generally are." "So nice of you to put it like that," she said, sweetly. But then she began to think about it.

Reducing by radio is becoming popular. One woman reported that 15 minutes exercise a day, directed by the expert for one of the large broadcasting companies, cut her weight from 150 to 130 pounds.

Verms, by the irritation that they cause in the stomach and intestines, deprive infants of the nourishment that they should derive from food, and malnutrition is the result. Miller's Worm Powders destroy the worms, correct the morbid conditions in the stomach and bowels that are favorable to worms, so that the full nutritional of the child is assured and development in every way encouraged.

Though angeworms cannot distinguish objects they are not blind. They have light-sensitive organs distributed along the whole length of their bodies that perform the function of the normal eye.

After Shaving—Minard's Liniment. W. N. U. 1924

Can't Sew, but Keeps in Style!

Wear the colors that are stylish, but save the cost of new materials and labor of sewing. You can have dyed dresses just as good as the professional dyer!

A secret of perfect home dyeing (dyeing) is to use **real dye**. Diamond Dyes are true dyes. They dye most colors and fast in beautiful tones. And so easy to use! Any kind of good-night over other colors. Dye your curtains and other furnishings too.

FREE ask any druggist for the Diamond Dye Cyclopedia. Valuable suggestions, simple directions. Piece-goods color samples. Or, write for Big Illustrated Book Color Craft to **DIAMOND DYES, Dept. N12, Windsor, Ontario.**

Assailant Identified
The youth who attempted Mussolini's life in Bologna recently and who was killed by the crowd surrounding the premier, was identified as Antonio Samboni, son of a Bologna printer.

A fire has been burning for 67 years in the Summit Hill coal mine in Pennsylvania. Engineers estimate that it has consumed 14,000,000 tons of coal. More than \$3,000,000 has been spent in fighting it.

MOTHERS PRAISE BABY'S OWN TABLETS

Mrs. L. M. Brown, Walton, N.S., says: "I cannot praise Baby's Own Tablets too highly. I have found them invaluable for the ailments of little ones. Mrs. Brown's testimony is the same as that of thousands of other mothers who have used the Tablets. To the mother who is anxious to see that her child is kept in the home as long as there are babies or young children to be cared for, the Tablets are a laxative—mild but reliable in action—which never fails to regulate the stomach and bowels, relieve constipation and indigestion; break up colds and simple fevers and make the dreaded teething period easy. In fact you banish all the minor ills from which little ones suffer. The Tablets are sold by medicine dealers or by mail at 25 cents a box from Dr. Williams' Medicine Co., Brockville, Ont."

B.C. Lumber Exports

Exports of lumber from British Columbia for the first half of 1924 established a record with \$65,505,243 of lumber shipped out as compared with \$58,911,523 for the corresponding period of last year—an increase of 49 per cent. Larger shipments to Japan and to the Atlantic seaboard averaged the total of exports this year.

All Night with Asthma. Everyone knows how attacks of asthma often keep their victims awake the whole night long. Morning daze him who is unable for a day of business, and yet, business must still be carried through. All this night suffering and lack of rest can be avoided by the prompt use of Dr. J. P. Kellogg's Asthma Remedy, which positively does drive away the attacks.

The 600 songs of Schubert were written—sometimes ten in a day—in the fourteen years between the time he was 17 and his tragic death at 31.

Troubled with Lame Back for Over 17 Years

Now feeling fine as a fiddle

Harry H. Buss of Edmonton, B.C., suffered from a lame back for over 17 years. Every spring he was laid up from work. He tried many remedies, but could not obtain relief. He was advised to try Glu Pills and immediately obtained relief. Read his letter:

"There is nothing to compare with Glu Pills for the relief of my back. I had a lame back for over 17 years. I tried almost everything, but to no avail. I could not sleep, and after a long time I was laid up from work. I was advised to try Glu Pills and immediately obtained relief. Read his letter:

Pains in the back, constant headaches, swollen joints, painful urination, soury urine, bristling of the scalp, scanty or too frequent voiding of urine are all symptoms of kidney trouble. Believe you are suffering and ensure a future free from kidney ailments. Get a box of Glu Pills today. Get it at all druggists. National Drug & Chemical Co. of Canada, Limited, Toronto, Canada.

Sentiment vs. Economics

By C. W. Peterson

To those who live in the phenomenal prosperity of the United States and the magnetic attraction it has for the people of Canada, a tendency which might some day easily lead to a weakening of the ties that bind Canada to the British Empire, our present economic position is not entirely reassuring. Because history shows that in the course of time economic considerations will invariably prevail over patriotic sentiment. While we cannot hope to outstrip our powerful neighbor, we can come much nearer creating opportunities for our own people at home than we are doing at present and thus arresting the debilitating leak of our precious vital asset and stifling the insularity complex we have unconsciously created in our public mind, which cannot be without its important influence upon the individual decision leading to southbound migration.

It is useful to arrive at a clear appreciation of the general economic effect of an enlarged agriculture. The average person rarely gives intellectual assent to the time-worn phrase that agriculture is the "backbone of the nation," but usually without position of the fact of the matter. It is, therefore, well to consider briefly to what extent agriculture has been responsible for Canada's material progress. Forty-one per cent of our total production in the last census year was agricultural; thirty-three per cent manufacturing; our forests, mines, fisheries, construction etc., account for the remaining twenty-six per cent. Our \$ billions of agricultural capital represents 26 per cent of Canada's total available wealth. Urban real estate accounts for 26 per cent, our railway plants, 10 per cent; forests, 5½ per cent; mines, 2½ per cent, and manufacturing equipment, 2½ per cent.

This gives a line on the paramount position of our agricultural industry and suggests that a policy having in view the colonization of Canada's vacant lands along vigorous lines, would readily lead to increased prosperity in our urban centres and should interest all classes of Canadians irrespective of occupation. The Hon. Mr. Forke, Canada's new Minister of Immigration, has recently announced his intention of directing up the work of his department overseas. It is hoped that his efforts will meet with every success. His department squarely faces Canada's key problem.

Nine Million Pounds Of Twine

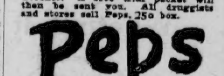

Co-Operative Supply Department of U.G.C. Transacts Large Volume of Business

Nearly nine million pounds of binder twine were handled by the Co-operative Supply Department of the U.G.C. for the harvesting of the 1924 crop. This makes a total of over forty million pounds of twine handled by the company during the past five years, and of over eighty-five million pounds of twine since the company first went into the twine business. In 1914, when the company, the Grain Growers' Grain Company first undertook the distribution of binder twine it was impossible for a farmers' organization to pay twice at wholesale prices, and the company's supply of its large purchasing power, had a good deal of difficulty in making purchases at first. For a time it was necessary to import twine made in England. But that time twine was handled only through certain well defined retail channels, and the retail profits allowed added from two to four cents a pound to the cost of twine. Now, thanks to the work done by the farmers' company, a large part of the twine used is distributed through farmer organizations, at U.G.C. elevators and by local associations. The total savings to farmers that have resulted are not easy to calculate, but probably two million dollars has been paid by farmers for U.G.C. twine than they would have had to pay under conditions formerly prevailing, and still prevailing to a certain extent in parts of the country where there is no competition from farmers' organizations in the handling of twine. But that is only a part of the saving to farmers, because this competition has brought about a lower scale of prices for the twine over the country, resulting in savings of many millions. More than two million dollars' worth of twine has been handled each year by United Grain Growers. Besides binder twine one of the largest items in their list of goods is twine. Last year 1,650 tons were sold, nearly all at elevators equipped with four sheaves. The value of this was \$208,433, and during the year one year ago was valued at the value of over \$250,000. The twine business has been distributed. The total business of the company amounts to over half a million dollars each year, more than two thousand carloads being handled. While twine goes through an elevator coal shed, a good deal is sold through local associations, which have the company's interest. The associations are unable to buy coal at wholesale prices.

Listen!

Have you heard about Peps? It is a scientific preparation put up in a little form, which provides an entirely new and effective treatment for coughs, colds, chest and throat troubles. Peps contains certain medicinal ingredients, which, when placed upon the tongue, immediately turn into vapor, and are breathed down the air passages to the lungs. On their journey, they soothe the inflamed and irritated membranes of the bronchial tubes, the delicate walls of the air passages, and finally enter and carry relief and healing to the lungs. While no liquid or solid can get to the lungs and air passages, these Peps fumes get there direct, and healing comes.

FREE TRIAL Cut out this coupon, fill in the name and address, write a note to the nearest Peps agent, and mail it with this coupon. A free trial of Peps will be sent to you. All druggists and stores sell Peps. 25¢ box.

Seals Date Back Centuries

Seals used to authenticate modern legal documents date back to at least 4,000 B.C., and were man's first printing press. It is disclosed at Washington by Dr. L. M. Casanovic, Old World archaeologist of the National Museum under the Smithsonian Institution.

A stone weighing 35 tons was lifted by the waves and thrown completely over a breakwater during a gale in the Bay of Biscay.

A man pleases himself when he can and a woman when she must.

The First Shipment of Wheat Exported From Western Canada Left Winnipeg Fifty Years Ago

Fifty years ago the first consignment of wheat was shipped from Western Canada. This shipment of 800 bushels of Red Fife wheat, the entire exportable surplus of the Canadian West at that time, left Winnipeg on October 12, 1876, consigned to L. C. Steele, a grain merchant of Toronto. It was sold for 85 cents per bushel by Higgins & Young of Winnipeg, whose bill head announced them to be "Importers of Boots, Shoes, Crockery and Glassware." The wheat was sent by the Great River boat to Duluth from which point it was shipped by railroad to Toronto, as there were no railroads in Western Canada until the early eighties.

In 1926—just 50 years later—Canada is the largest wheat exporting country in the world. The wheat of the Dominion this year totals nearly 400,000,000 bushels, ninety per cent of which was grown in Western Canada; and that same part of the country now produces hundreds of millions of bushels of oats, barley, rye, flax and an abundance of other field crops and farm products. The wheat crop of the Canadian West is now a dominant factor in the world's wheat market, and the Canadian Wheat Pool, with its membership of about 130,000 actual farmers in Manitoba, Saskatchewan and Alberta, controlling approximately 70 per cent of the total wheat acreage in Canada, is the largest farmers' co-operative organization in the world. The pool has selling agents in 51 ports of the world.

The anniversary of this historic event was celebrated by a banquet given by the Winnipeg Board of Trade at the Royal Alexandra Hotel, Winnipeg. Two of the men who handled the first shipment, now among the speakers. In 1876, the year in which this shipment took place, 14,769 acres were planted to wheat, whereas this year the wheat acreage in Western Canada was 21,794,738 acres.

Scots, Scotch Or Scottish

Correct Adjective Has Been Subject of Dispute For Centuries. The British people are still trying to settle the three-cent-old verbal squabble. In referring to their neighbors south of the Tweed, which adjective is correct—Scots, Scotch or Scottish?

Ever since the Government ruled a few years ago that "The Scotch Education Office" in the future be styled the Scottish Education Office there has been some confusion and contention. Nonsensical, as help has come from "that knuckle-head of England," as Sydney Smith referred to the region beyond the Cheviot Hills.

The northerner is observing his traditional cannyism in this matter. Secretly he is said to prefer Scots. No best native son than Sir James Barrie, however, while seeming to share this preference can only tongue-pipe precept with example. He says in "What Every Woman Knows": "Have you forgotten the grandest moral attribute of a Scotsman, Margaret, that he'll do nothing which might damage his career?"

But English literary pundits remind the northerner that while Burns' famous war cry, "Scots wha hae us Wallace bled, Scots wha hae Bruce hae often led, supports the preference for Scots, yet he more frequently used the adjective Scotch. So did another author, Sir Walter Scott, who further reminds the world that King George IV, once confided to him that "The Scotch are a nation of gentlemen."

Dr. Samuel Johnson was a great authority upon correct usage. One of his valuable contributions to the subject was the stunning opinion, "The noblest prospect that a Scotchman ever sees is the high road that leads him to England."

Canadian Potato Crop

According to the Dominion Government forecast at September 29th, the Canadian potato crop will amount to 42,473,000 cwt. as compared with 42,379,000 cwt. in 1925. The yield of turnips is estimated at 23,164,000 cwt. as against 22,010,000 cwt. in 1925. Potatoes, turnips and sugar beets are valued at \$1,429,400 tons and sugar beets at \$1,451,000 tons.

Truck and delivery horses owned by the municipality of Berlin have a three-week vacation each summer on a 160-acre horse mania in charge of skilled veterinarians. Reports indicate possible early on the part of human laborers.

Necessity knows no laws; Scotland merely ignores it.

Australia plans to spend \$100,000,000 in a road improvement program.

Sheep And Swine Show

Great Interest Is Taken At Annual Show Held At Saskatoon

The annual sheep and swine show held in Saskatoon opened with the neighborhood of 700 head of stock of all ages, about 100 of which were sheep. The majority of the classes were well filled in the major breeds of both sheep and hogs in both market and breeding lots.

John Wilson of Innisfail, Alta., who judged the sheep, expressed it as his opinion of the quality of the entries that he had never seen the equal of it in western Canada, and that most of the top in the various classes were exceptionally fine. Placings in the Sheep show and Oxford breeds was often close. Harry Follett, of Duval, Sask., and W. S. Benson, of the University of Saskatchewan judged the hogs. Competition in the Yorkshire breeding classes and in the market classes was genuine and drew the majority of the fair crowd of spectators who followed the placings closely.

Four prominent breeders were present—F. A. Early, Saskatoon; Wm. Darnborough, Laura, Sask.; A. C. Stewart, Abbotsford, B.C. and J. D. Whitehead, Nipawin, Sask. The last named breeder was successful in winning the top ewe which had offered for the best Saskatchewan bred Shropshire sheep at the show on the ewe No. 5544, a beautiful ewe with a fine, deep body and lots of breed type. Other winners by the same breeder were first for pen of three ram lambs, first for ram and ram lambs, first for flock consisting of ram, two ewes and two ewe lambs, first for sheeping ram, first for ram lamb, first for ewe, first for shearer ewe and second for ewe lamb.

Good Business For Canada

Tourists Spent Nearly \$200,000,000 In Dominion Last Year. Tourists from the United States spent \$199,956,000 in Canada last year, J. M. Wardle, chief engineer of the Canadian National Parks, told the Good Roads Association at Edmonton, the other day. The sum is more than five times the value of the output of all the gold mines of the country for the year, and is 62 per cent greater than the output of all our metal mines. As the tourist business is good business, since it is all done on a cash basis, and the profits are immediate and beyond question, it would be the part of wisdom for Canada to do what she can to expand it. This can be done in two ways: by inducing more tourists to come and by inducing those who come to remain longer—Vancouver Province.

Alberta Best Sugar Industry

The best sugar factory at Raymond, Alta., is now on its second year's run with a full staff of workmen and adequate supplies of beets. The mill will probably be slicing beets for the next three months. Tonnage is running higher than last year and the sugar content of the beet is improving.

A man without ambition is like a pig of dough without any yeast to raise it.

Berlin has more than 200 beekeepers who keep 2,600 hives on the flat roofs of buildings.

Highway Improvement

Nearly a Million Dollars Spent This Year on Good Roads in the Province. Nearly a million dollars was spent on highway construction in Saskatchewan during the fiscal year—\$668,890.46 to be exact. Since work began in 1919, on this system of good highways, nearly five million dollars have been spent, or in actual figures \$4,996,952.64. Exactly two thousand miles of roadways have been built under this plan, according to reports from the Ministry of Highways, and a third of the amount can be credited to main market roads.

B.C. Potatoes Wanted in Mexico

British Columbia's reputation as a potato grower is again seen in an order that has come from Mexico for a hundred thousand bushels of British Columbia potatoes. G. E. Bates, secretary of the British Columbia Potato Growers' Association. Unfortunately, the order had to be turned down owing to its being impossible to supply the specific type of potato required.

Big Wool Clip

The Canadian wool crop for 1934 at 11,600,000 pounds, or an increase of a million over 1925. Eastern domestic wools have been up to standard and westerns possibly the best ever taken. Nearly four million pounds of this year's clip will likely be handled by the co-operative organization of wool growers.

Will Written On Egg Shell

A will written on an eggshell was submitted recently in an English probate court. The egg had been blown and the will was written on the empty shell with an indelible pencil. It was the testament of a Manchester ship canal pilot.

Good Plowing Is Essential

Fundamental Operation on Which Good Crops Are Based

If there is any one implement, any piece of farm equipment, any symbol of clean farming and prosperous agriculture, it is the plow. We can cultivate diligently, choose the best of seed, use fertilizers lavishly and know the science of good farming as it is taught and preached; but good plowing is the basic operation on the farm, and if the plowing is badly done it is likely the whole crop season will be followed through with the same stumpy and sloppy attention to the land. Plowing is not the only operation influencing crop yields and weed suppression, but it is the fundamental one, and the manner in which it is done brands the farmer as either thorough and painstaking or careless and indifferent.

The provincial plowing matches are of utmost significance, but the local matches are where the great rank and file of younger men get their inspiration and experience. More honor is due the winner of one of these matches than is deserved by the champion golfer or the hero of the rugby field; but honors are unequally bestowed in these days, and sometimes misplaced. In spite of that, however, every encouragement should be given to the plowing match, and particularly to the younger men whose brave enough to match against each other their skill and prowess with the plow.

Tar Sand Paving Material

Bituminous Sand Deposits in Northern Alberta Attract Much Attention

The Port McMurray bituminous sand deposits—the raw material for tar sand paving—continue to attract considerable attention and comment as the source of an important new industry. S. C. Ellis, engineer of the Dominion Mines Branch, speaks of the industry as being destined to greatness in the future while analysts' reports from laboratories in the United States and England concern in speaking well of the samples received by them.

Won Baking Prize

One-Armed Woman Prepares Meal In Record Time

Although having but one arm, Mrs. George Lyndon, farmer's wife of Pearl River, N.Y., won a crown of parsley and first prize in a cooking contest, held at the art-in-industries exposition New York. In 20 minutes and 16 seconds she prepared a "square" meal, consisting of the following: Tomato bisque soup, boiled chicken, French fried potatoes, string beans, tomato salad with cheese and canned peaches, ice cream and sauce.

A Promising Oil Well

Cores taken from the Ribstone-Blackfoot test well which the Imperial Oil is drilling on the structure about 20 miles south of Lloydminster are interpreted with a heavy oil, according to Manager T. Draper of the Imperial Oil, Limited, headquarters in Calgary. The cores were taken at a depth of 1,859 to 1,950 feet. The oil showings indicate an oil similar to that in the Walworth field. The oil is about sixteen feet thick which gives possibilities of a good well, so the Imperial Oil experts say.

Settlers From U.S.

Migration from South of the Border Reported to Be Active

Immigration to Canada of farm settlers from the United States for the month of September was particularly active, according to reports received from the agencies of the Department of Immigration and Colonization. In September the agency at Fargo, North Dakota, headed the list of the 18 agencies of the Department in the United States with a total of 675 persons sent to Canada. The increase of 209 over September, 1925. These 675 settlers brought with them cash and effects valued at \$176,985. Only 10 were not of the farming class.

The agent at Syracuse, N.Y., reports that more settlers have been sent to Canada through his office since April 1st, this year, than in any year since 1915. Reports for September from the other agencies show increased migration of the best class of farm settlers, when compared with September of recent years.

Ship Applies to Britain

Shipments of Canadian apples to European ports will exceed by fifty per cent those of last year, according to J. R. Sutherland, general freight agent for the Canadian Pacific Express. The increase is largely accounted for by the installation of refrigerator service on certain Atlantic steamships.

Before giving advice a wise man prepares to dodge the consequences.

Canadian Farmer Has Relatively Happy Position Compared With Those In Other Zones

Community Breeding Of The Saddle Horse

Farmers Receiving Attractive Prices For Half-Bred Foals

In organizing the Remount Horse Breeding Station in Frontenac county, Ontario, in 1922, the Live Stock Branch of the Department of Agriculture at Ottawa did a good service not only for the farmers of the district but also for those who desire to buy saddle horses. The district served by the station has produced three crops of half-bred foals from the thoroughbred stallions placed within it by the Department of Agriculture in co-operation with the Ontario Farming Association. At the recent horse show at the station, held near Kingston, about forty head of young stock were exhibited. Although the market for saddle horses of general purpose type and of varied breeding, the young stock were strikingly uniform, showing pronounced thoroughbred characteristics and possessed of sufficient weight to make first rate cavalry or saddle horses. The show brought out thirteen specimens of the hundred half-bred foals produced in the district this year, besides good classes of yearling, two-year-old, and three-year-old stock. The fact that the district are already receiving attractive prices for their half-bred colts and it will take but a few years to bring about a recognition of the district as a source of promising saddle horses. The headquarters of the station is the fourteen-hundred-acre farm of Major Palmer Wright, near Chaffey's Locks, who is himself a breeder of considerable extent. The past two years the station "Amen" presented to the Dominion Government by King George, was one of the horses that stood in this neighborhood and is leaving the mark in an admirable way on the young stock of the district.

Many people have the idea that farming in the so-called north temperate zone such as is characteristic of the northern United States and Canada, is attended by climatic difficulties and circumstances which are unknown in the sub-tropical areas of the earth. The Natural Resources Intelligence Service of the Department of the Interior at Ottawa points out, however, that the Canadian farmer is in a relatively happy position. His growing season is fairly well defined. His crops are of a type that are sufficiently resistant to the changes of temperature and wind and, to a less extent, moisture, as to leave him with comparatively few worries during the bulk of the growing season. Moreover, summer weather in Canada is particularly favorable to plant growth on account of the unusually long days of clear sunshine, with periodic showers. It must not be imagined that more southern districts do not offer definite problems as to climate. In the sub-tropical belts, favored as they are in many ways as to climate, man fights against frosts in California; has to grow his crops by walls or on terraces against high winds as in the Azores, in Malta and in southern France; manufactures artificial ice in Palestine; retards the ripening of his fruit under the spring sun by screening it, as in Italy, where the fruit is covered with straw to protect it from the sun. Thus it will be seen that every latitude has its own problems in agriculture, and everything being considered, Canada, with its wholesome summer sunshine, periodic showers, and its relative freedom from cyclonic disturbances, is beautifully blessed by providence and will become increasingly desirably as the land for agricultural development due to the consistency of her crops, the relatively simple problems of cultivation, the increasing land values and the substantial returns.

Does Not Mould or Spoil Under Proper Conditions. Honey, like other highly concentrated sugar solutions, will keep well for a long time with proper care, as it does not ferment, and is not subject to spoil, will, however, absorb moisture, and if exposed to a moist atmosphere, may become diluted to the point where fermentation occurs. It should be kept in a dry, warm, airy place, writes A. H. H. in a recent issue of the Canadian Experimental Farm, Ottawa. Temperature is not so important in the storing of extracted honey. Where large quantities are stored it is frequently necessary, owing to the enormous weight, to use the cork stoppers, though it may be cork, must not be damp. The containers of extracted honey ought always to be tightly closed to exclude moisture and incidentally ants, should they gain access to the storehouse. Well ripened honey will keep for years stored where it will not attract moisture.

Training Students For Leisure

Should Be Part of Curriculum Says College President

Dr. George Hutton, president of Calgary University, addressing the Thirtieth Recreational Congress of the Playground and Recreation Association at Atlantic City said that it was imperative that educational institutions train students for leisure as well as for a vocation.

"We find that with the large amount of leisure that has been thrust upon the world since before we realize it," he said, "there has been no training for its proper use."

Dr. Hutton continued that colleges would not be quick to understand this new form of training. "It is harder to break into a college curriculum," he declared, "than it is into society."

"Training for leisure should be as strenuous as training for a vocation. As the great majority of people never go to college, the training must not only be a part of the college but perhaps even more so of primary and secondary schools. And our night schools instead of being strictly vocational must spend some time in training for leisure hours."

Dairy Industry Flourishes

Production of dairy products in Canada is now at the \$500,000,000 level with exports running to \$57,000,000 annually, report issued by Dr. J. A. Rudick, Federal Dairy Commissioner, shows that the eastern half of Canada produces 98 per cent of the cheese and 71 per cent of the butter; although this inequality between east and west is gradually being shaken down.

Draw Up Your Muscles

Speed and accuracy of thought increases when you draw up your muscles, experiments recently conducted at the University of Chicago indicate. Forty students were laid to work on a series of nonsense syllables and adding columns of digits. It was found that they worked much faster while exerting a grip of 31 pounds.

Joseph Zaslavsky went to work on a farm near New York, and to work again for nine months and worked it 91 years continuously. He is still able to do a full day's work.

It doesn't take a very bright woman to dazzle the average man.

"King of Swat" Visits Canada

Babe Ruth, idol of the baseball world and whose brilliant exhibition at the plate during the recent world's series only added to his laurels, delighted thousands of his fans when he played in an exhibition game in Montreal recently. Ruth went into action directly from the world's series, with two star semi-professional teams with Vernon Shooker, Yankee pitcher on the mound. The fans were not disappointed for Babe Ruth the giant of baseball and showed them everything they expected to see, with the addition of other diversions which were wholly unexpected. Ruth, during the game played first base, shortstop and pitcher and even went behind the plate to umpire. The "Swat King" cloaked two home runs in the game. The game was called when it was announced that 38 balls had been driven out of the ball park in practice and in the game and there were none left with which to continue the game. Ruth and Joe Page, director of athletics of the Canadian Pacific Railway, are seen in the photograph which was taken at the Yankee Stadium, while Page was arranging details of Ruth's visit to Canada.

City of Manchester Confers Freedom of City On Dominion Premiers

Manchester.—In a scene of quiet dignity, Manchester conferred the honorary freedom of the city on the Dominion Premier and the Maharajah of Burmah, although the absence of 40 objecting labor members of the council, almost one-third of the total membership, robbed it of some of its impressiveness.

Seats were there for the labor men but they remained unoccupied.

Premier J. B. Hertzog was unable to attend. As the resolution referring to him was reached, Lord Mayor Mitchell read a wire from the South African Prime Minister expressing his regret and appreciation. The Lord Mayor intimated that he would be in London on Monday and asked if it would meet the wish of the city council if he should present the silver tablet containing the scroll of freedom to Premier Hertzog there. "Agreed," cried the members of the council, and the mayor passed to the resolution conferring the freedom on Premier Wm. T. Cosgrave, of the Irish Free State.

To this special interest was attached, for Premier Cosgrave was the first representative of the Irish Free State to receive the freedom of Manchester. In recognition of this Premier Cosgrave received the freedom in a special basket of silver and gold. The others were of silver. The Free State premier was warmly applauded when he expressed the hope that the event would lead to close and effective cooperation between the two countries.

Presenting the scroll of freedom to Premier Mackenzie King, the lord mayor recalled that 20 years earlier Sir Wilfrid Laurier, too, had received the freedom of Manchester. The Canadian Prime Minister, replying, observed that under the will of Lady Laurier he had possession of the scroll presenting the freedom to Sir Wilfrid. The two scrolls, he said, would now come together for generations to come.

Would Amend Bank Act

Proposal to Make System More Acceptable to Needs of Farmers
Winnipeg.—Proposed amendments to the Bank Act, with the object of making the banking system of the Dominion more adaptable to the needs of the agricultural industry, were discussed at a session of officials of the Canadian Council of Agriculture.

A memorandum prepared by A. E. Darby, of the research department, was submitted and after discussion it was decided to circulate the memorandum among the various branches of the organization, with the object of bringing the matter finally before the annual convention.

Germany Paying Up

Total Reparations Up To June 20 About \$750,000,000

London.—Mr. Guinness, financial secretary to the Treasury, told the House of Commons a few days ago that the total payments by Germany in cash or kind, distributed by the Reparations Commission between the Allied Powers on account of reparation, up to June 20 was approximately \$750,000,000. The allocation of the British Empire was \$125,000,000, of which the share of the United Kingdom was approximately \$110,000,000.

Files First Manitoba Entry

Samuel Lacombe Will Send Crop Samples to Chicago Show

Winnipeg.—Samuel Lacombe, of Birtle, Man., has the distinction of being the first Manitoba exhibitor to file his entries with the International Grain and Hay show which opens in Chicago November 27. He will send samples of wheat oats and other crops. Mr. Lacombe, who is known throughout the continent for his research of farmers in the field of agriculture, attended the exhibition last year as the official representative of the province.

Noted Surgeon Dead

Dr. Wishart, London, Ont., Performed First Appendicite Operation

London, Ont.—Dr. John Wishart, surgeon of international repute and credited with having performed the first modern operation for appendicitis, died here following a lengthy illness.

Dr. Wishart founded the medical school of the University of Western Ontario. He was born near Guelph and began practice in London more than fifty years ago.

W. N. U. 1654

Tariff Board Applications

Six Applications to Come Before The Board This Month

Ottawa.—Six applications have been scheduled for hearing at a public sitting of the tariff board to be held in Ottawa on November 15 and 16. The applications selected to come before the board are as follows:

By several Ontario cereals companies, for increased tariff on oats. By the trustees, "National Valley," Ottawa, for decrease of the tariff on objects of art.

By Price, Patterson, Ltd., Vancouver, for reduction of tariff on "tops" for gloves.

By Charles Barber and Son, Montreal, for reduction of the tariff on water wheel governors.

By H. S. Tibbs, Toronto, for reduction of the tariff on foxes and canaries imported for breeding purposes.

By Hunter-Koss Company, Toronto, for reduction of tariff on book sheets (unbound).

The application for a "seasonal tariff" on fruits and vegetables by the Canadian Horticultural Council, as well as that of certain Quebec organizations for a higher tariff on potatoes, will be given a public hearing on December 16.

Missionaries Are Safe

Situation in China Now Reported as Very Quiet

Toronto.—Word received at United Church of Canada missionary headquarters here from P. R. Altar, M.D., medical missionary at the general hospital of the West China mission at Tientsin, Szechwan, China, indicates the situation in that district as very quiet.

"We are planting our regular fall potatoes, and if we have to go they will be ready by the time we get back," Dr. Altar writes.

Dr. Wallace McChare, missionary, representing the United Church of Canada at the hospital at Kiangsu, South China, also reports conditions much improved at that station. While the anti-British trade boycott still militating against some mission work, the hospital again was busy.

Entertained By Royalty

Small Boy Has Enticed Ride on Special Train of Queen Marie

Spokane.—A small boy looked at a queen and was carried away from his home for it. Lester Brown, aged ten, was found aboard Queen Marie's special train a few minutes after he had left Sand Point, Idaho. He was in tears. He had slipped aboard the train as it slowed down for Sand Point and had been unable to help off as it passed the station because of the press of the crowd.

Queen Mary comforted him and the Royal caddy was brought into play. He was the Queen's guest until Spokane was reached. Marie, herself, telegraphed the boy's parents. After playing back tag with Prince Nicholas and Princess Helena, Lester dined with the Royal family.

Prince of Wales May Officiate

Ottawa.—The Prince of Wales will be invited to officiate at the formal opening of the earthen of 53 bells in the Victory Tower on Parliament Hill when he comes to Canada. His Royal Highness held the corner stone of the tower upon the occasion of his first visit to Canada seven years ago.

The Melting Pot in the West

Pick where you will in this group and you will have difficulty in saying which of these girls comes of Russian, British or original Canadian stock. They are typical of the Prairie Provinces where all the nations of Europe come in and settle on the land. And when the next generation rises from the effort and struggle of the first settlers, they are all of them pure Canadian. Their outlook, their appearance,

CONFERENCE IS LIKELY TO LAST UNTIL NOV. 24

London.—Another three weeks in all probability lies ahead of the Imperial conference.

Efforts are being made to speed up work and adjournment of the conference by November 15 is suggested. But in view of the constitutional issues raised by Premier Hertzog there are serious reasons for believing that it will not adjourn until the eight-hour day agreed to at the Washington labor conference.

This hesitation has caused a crisis in the International Labor Bureau, which was created under the Treaty of Versailles at the same time as the League of Nations.

Labor delegates on the executive council of the bureau have threatened to leave the organization altogether unless something is speedily done to secure an eight-hour day throughout Europe. Both Jaurès, the French labor leader, and Oudegast, the Dutch labor leader, have issued a warning that the Labor ranks of Europe are becoming impatient over the delay.

It is probable that an additional defense plan on the part of Canada. Following the example of the British ministers he proposes to survey what is being done at the present time, but considers that any additional defense proposals are matters for the Canadian Government and the Canadian Parliament to decide.

Although there has been no official statement on the question of defense as far as Canada is concerned, it is considered probable that any developments by the Dominion along this line would be in the encouragement of aviation. Premier King already has given an indication of this in promising full co-operation in the development of civil air routes.

Charge Against British Woman Is Dismissed
Criticisms of Fascist System Was Only Theoretical

London.—The Daily Sketch prints a letter from Mrs. Agnes Staden, niece of Lord Dunsmore, who was under arrest at Volosca in Italy, for allegedly making "socialist utterances" against Premier Mussolini to the effect that after spending three days and nights in jail her husband and the British consul secured her release on bail.

Subsequently the British ambassador visited Premier Mussolini and the charge against her was dismissed. Mrs. Staden, according to the letter, says her arrest had its origin in a conversation in a restaurant in which she "merely criticized" Fascism "academically and theoretically" and an Italian woman who disliked her reported her to the authorities.

Fossilized Animals Found
Ottawa.—Fossilized remains of a large lizard or alligator, ten feet long, in addition to those of an animal 25 feet long, a sharp, have been discovered by John Kennedy, vice-president of the United Grain Growers of Manitoba, according to information received by the Minister of the Interior. The find was made in the Souris River Valley, near Estevan, Saskatchewan. Experts of the department will be sent to examine the find.

To Help Reduce War Debt
London.—Sir Wilson Mappin, Baronet, of Sheffield, after making certain provisions for Lady Mappin, his daughter and other members of his family, left the residue of the estate to the Imperial Treasury for reduction of the National Debt incurred for the purposes of the recent war. His great estate was about two and a quarter million dollars.

Council of Agriculture Suggests Amendments To The Farm Loans Bill

Want Eight-Hour Day

Canada May Legally Seize Rum Running Ships Outside Three Mile Limit

Ottawa.—Canada has the right to seize and confiscate British or Canadian rum running vessels outside as well as inside of the three mile limit along the Canadian coast lines, contends W. F. O'Connor, K.C., former counsel in the federal customs inquiry, who at the request of Sir Francis Bannerman, "Chancellor of the Royal Customs," has completed and presented his argument on this important question to Sir Francis.

Any evading of or attempt to evade Canadian revenue laws, committed on any British or Canadian ship even on or from the open sea is punishable in Canada, Mr. O'Connor asserted. The gally ship and those aboard her, in his opinion, may be seized at sea and brought into Canada for trial and any body ashore who has aided or abetted the offence is criminally liable with those on board the ship. Both ship and cargo, Mr. O'Connor declares, are subject to confiscation.

Foreign ships and those on board them, engaged in like evasion of the Canadian laws are to a more limited, but quite sufficient extent, amenable also to Canadian criminal law, Mr. O'Connor further declares.

The problem of rum runners in the Bay of Fundy, Northumberland Strait and the Gulf of St. Lawrence is also dealt with. Mr. O'Connor expresses the opinion that the sea bed waters these waters is part of the territory of Canada and that an offence committed on board any British or foreign ship in either place is as justiciable in Canada as if committed on a ship lying at a United dock. It follows from this argument, it sound, that the Department of Customs has been releasing ships and cargoes that ought to have been condemned.

If Mr. O'Connor's contentions are made good they will assist in remedying the problem of defence of the sea coast from smugglers a comparatively simple proposition.

THE GREAT HERBAL SKIN BALM

Every Woman Deserves One

The SMP Roaster is a fine time saver. You put the roast or fowl in the oven. The roaster does the rest, bastes, roasts to perfection. It roasts with very little shrinkage, thus saving dollars every year. None of the tasty meat juices are lost; all the rich flavor is retained. Besides you can buy cheaper cuts, for it makes cheap cuts taste like choice ones.

The close fitting cover keeps all the roasting odors and the grease inside the roaster—the smell of cooking doesn't fill the house, and the cooking is sweet and clean. Best of all, it cleans out in a few minutes after the cooking is over. It is a splendid investment. Price \$35. to \$35.50 according to size and finish. Sold in all hardware stores.

ROASTER

See Might Of British Navy

Delegates to Imperial Conference
Witness a Most Impressive Scene

From the decks of the battleship Revenge, flagship of the Atlantic fleet, the Dominion's delegates to the Imperial Conference recently saw the navy at work. It was a sight that in its impressiveness obviously left its mark. It was not the usual review of long lines of ships with flying flags. The visitors saw the Atlantic fleet in battle practice. They were attacked by submarines which registered hits with their torpedoes. They passed through swept mine-fields and saw detached mines drifting off on either side. They were midway between the giant battle cruisers and the target at sea, ten miles range the 15-inch guns crashed out salvoes which were heard 30 miles away.

For 15 minutes the big guns concentrated their fire on the target. Then firing ceased. Now it was the Revenge's turn to attack. Under cover of smoke screens which hid them completely, destroyers launched torpedoes against the flagship. Again a hit was scored. But that was the last of the warfare. While the whole Atlantic fleet accompanied the Revenge back to Portland, the visitors were entertained at tea.

The visitors travelled from London to Portland on a special train and were welcomed aboard the Revenge by Admiral Sir Percy Oliver, commander-in-chief of the Atlantic fleet. The operations opened immediately after the Revenge moved out of Portland harbor. Submarines appeared, dived and then came to the surface again. Aircraft carriers sent seaplanes aloft to reconnoitre. Mine sweepers cleared the way and the Revenge advanced ahead, its paravane out, and detached mines floating harmlessly by.

But the mine fields were only the beginning. Periscopes again appeared. Torpedoes raced towards the Revenge and struck her on both sides. Destroyers dropped depth charges to neutralize them. The scene was so powerful that even the great battleship quivered under the concussion.

CARRIED WIFE TO BED

Suffered So She Could Not Walk. Restored to Health by Lydia E. Pinkham's Vegetable Compound

Mining, Ontario.—"I am a practical nurse and I recommend Lydia E. Pinkham's Vegetable Compound to suffering women. Three months I was almost helpless and could not sit at the table long enough to drink a cup of tea. Many a time my husband carried me to bed, I would be so weak. Then he read in the paper of a woman suffering as I did who got better after taking the Vegetable Compound, so he went and got it for me. When I had taken three boxes I was just like a new woman and have had splendid health ever since. When I feel any bearing-down pains I always take it; sometimes a half bottle or whatever I need. It is my only medicine and I have had many one about it. Any one wanting to know more about Lydia E. Pinkham's Vegetable Compound I will gladly write to her. I do all I can to recommend it for I feel I owe my life and strength to it."—Mrs. N. B. Bowser, R. R. 1, Mining, Ontario.

Do you feel broken-down, nervous, and weak sometimes? Do you have this horrible feeling of fear which sometimes comes to women when they are not well? Lydia E. Pinkham's Vegetable Compound is excellent to take at such a time. It always helps, and it taken regularly and persistently will relieve this condition.

Explorers Decide To Pool Resources

Representatives of Seven Countries
Will Discuss Expedition to
North Pole

As a result of the Locarno spirit permeating to scientific quarters, polar research and discovery enthusiasts have decided to put aside national jealousies and pool their efforts as a means of conquering the little known top of the world. The first get-together party under the new spirit took place in Berlin, November 2 to 12, with the foremost scientists in this field from Germany, France, England, Italy, Russia, Norway and America, taking part.

Dr. Fridtjof Nansen played an important role in this meeting which was promoted by the International Student Society. Professor L. A. Bauer of the Carnegie Institute in Washington represented America, Sir Napier Shaw, noted meteorologist, appeared for England, and Captain Walter Bernt, Zepplin pilot and founder of the International Student Society, represented Germany. Rold Amundsen and General Umberto Nobile, who flew over the North Pole in the airship Norge, expressed regrets at their being unable to attend.

The convention enabled the scientists to study the adaptability of the super-Zepplin now being constructed at Friedrichshafen under direction of Captain Eckener, designed for polar observations and discoveries because of its wide flying radius and its ability to land parties without anchor masts or landing belts.

It is also believed that sufficient interest in this airship can be created so that the necessary funds for completing its construction can be raised. Money for beginning the work was raised by public subscription through the International Student Society under direction of Captain Eckener.

Idea Is Sound

Pupils Tried to Determine What
They Are Best Fitted For

In the opinion of an English educational authority, teachers will have an important part to play in the near future along the line of guiding their pupils into right jobs. Some experimental work in that direction has, indeed, already been undertaken in London schools. A certain number of pupils were selected for observation, studied intensively for a year, and their parents then advised regarding the vocation for which they appeared best adapted. This policy, it is contended, will prevent the insertion of square pegs into round holes and thus aid materially towards securing high standards of skill and greater happiness in labor. Theoretically the idea is excellent, for it is only common sense to recognize that a youth starting out in life is more likely to succeed in a job that appeals to him. Contrary to this, it is never surprising that a worker should fail at an uncongenial job in which it is impossible to pump up real interest.

Child Welfare Council

Officers Are Elected For ensuing Year
at Meeting in Ottawa

Officers and members of the governing council for the ensuing year were elected at the 34th session of the Canadian Council on child welfare held at Ottawa, Vancouver was selected for next year's meeting. The following officers were elected:

Past-president, A. P. Page, Winnipeg; pres., Mrs. Charles H. Thorburn, Ottawa; vice-presidents, Dr. Helen R. Y. Reid, Montreal, and Dr. H. E. Young, Victoria, B.C.; hon. treasurer, Madame Jules Trauer, Quebec; exec. sec., Mrs. Charles H. Thorburn, Ottawa. Western section, chairman appointed were: Dr. Wyman, Dr. Weir, and Rev. Hugh Dobson, Vancouver. Western members of the governing council, of which Mrs. J. A. Stewart, Perth, Ont., is secretary, are: W. A. Weston, Mrs. Edith Rogers, Winnipeg; Dr. C. A. Barrager, Brandon; Mrs. R. J. Macdonald, Saskatoon, Sask.; Judge Emily Murphy, Edmonton, Alta.; Mrs. W. S. MacLachlan, Victoria, B.C.

The English minister to London is named Alistair Izet, the question mark being absent.

The Alberta minister to London is named Alistair Izet, the question mark being absent.

Keep your horses working with SPOHN'S Dispenser Compound. It cures colds, influenza, coughs and keeps the throat and chest clear. SPOHN'S Dispenser Compound is a powerful, safe and reliable remedy for all respiratory ailments. Write for free literature to SPOHN MEDICAL CO., 1000 N. 1st St., St. Paul, Minn.

High Altitudes Are Reached

Tropical Climate Is Found Far Above
The Earth

The tropics are not the only place to get tropical weather. If man could ever get there, he would find a tropical climate far above the earth. At very high altitudes the air becomes extremely warm, according to Dr. H. H. Turner, professor of astronomy at Oxford University. This statement has been confirmed by observations of meteors entering the earth's atmosphere. Although aviators can only get a few miles off the earth's surface, and unmanned instrument-carrying balloons ascend no more than twenty miles, the observation of meteors, or shooting stars, extends knowledge of our atmosphere up to about fifty miles.

REGAINED HEALTH IS NOW HAPPY

The Experience of a Quebec Woman
With Dr. Williams' Pink Pills

Mrs. L. D. Brader, of D'Agouillon street, Quebec, is one of the thousands of women who, when she found her health failing, resorted at once to Dr. Williams' Pink Pills, and now finds herself in perfect health. Mrs. Brader says: "I was very weak, subject to headaches and was unable to sleep well. Testimonials in the newspapers persuaded me to try Dr. Williams' Pink Pills, and the result has been most satisfactory. I have regained my health, the headaches have left me, I sleep well at night and I have gained in weight. Naturally I am feeling happy. I strongly recommend Dr. Williams' Pink Pills to all weak people."

Try Dr. Williams' Pink Pills for anemia, indigestion, neuritis, nervousness. Take them as a tonic if you are not in the best physical condition and cultivate a resistance that will keep you well and strong. If you will send your name and address a little box of Dr. Williams' Pink Pills will be mailed you prepaid. This little box contains many valuable health hints. Write for it to Dr. Williams' Medicine Co., Brockville, Ont.

Little Helps For This Week

For God that loveth not knoweth not God, for He is love.—John I, 8.

Yet while I love, say God the most, I deem.

That I can never love you over-much;

I love Him more, so let me love you too;

Yes, as I approach it, love is such.

I cannot love you if I love not Him, I cannot love Him if I love not God.

—Christina G. Rossetti.

Love to the Lord cannot possibly exist apart from neighborly love. For the Lord's love is love to the whole human race, which He desires to save eternally, and to adorn entirely to Himself, so as for none of them to perish. Wherefore, whosoever has love to the Lord has the love of his neighbor, and cannot help loving his neighbor.

—Emanuel Swedenborg.

Famous Parrot Is Dead

"Polly" Was Well-Known to Patrons of
the Cheshire Cheese Tavern

"Polly," the famous talking parrot of the equally famous Cheshire Cheese tavern in Fleet Street, London, no longer will reply "Scotch" to that oft-repeated question of visitors: "What will you have?"

After two months' illness, Polly is dead, having served for forty years as the source of amusement to thousands of guests at the tavern. All visitors were introduced to Polly as well as most of the world's ambassadors, all of England's prime ministers and thousands of noted people of all nations.

Now Polly will be stuffed and will be kept in the Cheshire Cheese dining room.

Sympathizing Visitor—"What did your master die of?"

The Maid—"I don't know, but it wasn't anything serious."

Physicians use Minard's Liniment.

Italian Women Are Barred From Office

Not Eligible for Municipal Positions
in New Ruling

By a decision made in the Ministry of Internal Affairs, Italian women have been definitely cut off from all participation in the political life of the nation.

It now rules, in fact, that women are not eligible for the post of Podesta. The Podesta are the Italian equivalent of Mayors, except that they are appointed by the National Government instead of being elected by popular suffrage.

The women's suffrage movement has undergone strange vicissitudes under Mussolini's Government in Italy. First he granted the women the right to vote in municipal elections which was generally interpreted as the first step toward granting them suffrage in political elections. No sooner had this law been enacted than the adoption of the system, by Podesta, suppressing municipal elections, deprived the women of their newly acquired right to vote.

The recent ruling by the Ministry of Internal Affairs rob them also of the right of becoming heads of municipalities which they had won when they were granted the municipal suffrage.

Observe Ancient Custom

Remote Districts of Turkey Still Have
Death Grier

In remote districts of Turkey, quaint customs still linger despite Anglo-American modernizing aims.

One of the strangest is in the distant village of Cesarea. Whenever a death occurs in the depths of the night, the crier immediately shouts out the doleful tidings and wakes all the living villagers with his cries.

The post of Public Death Crier was established many years ago by the Brakal, an official organization controlling religious affairs, which still continues to pay the crier a regular salary for the performance of his grimly duty.

A silet machine that distinguishes coins by both their size and weight has been invented, making it impossible to substitute a franc for a quarter or a piece of lead for a coin.

The best catch in sixteen years by Canadian seafarers is attributed to the co-operating of air men who from their machines indicated where the animals congregated in the largest numbers.

She (at country fair)—"Look at the people. Aren't they numerous?" He—"Yes, and there's a lot of them."

The bones and muscles of the human body are capable of over 1,200 different motions.

Minard's Liniment for Neuralgia.

Coal fields on the island of Spitzbergen, it is estimated, contain a total of 8,350,000,000 tons.

SPIECE & SON, Authorized Dealer
MIRROR ALBERTA

WHEN you see and hear
the new De Forest &
Crosley models, you'll esti-
mate their prices many dol-
lars over what they actually
cost. "Amazing," you will
say.
The radio values we offer you
today have won for these sets
the reputation of being Cana-
da's outstanding radio buy.
We would like to demon-
strate any De Forest & Cros-
ley model in your home with-
out obligation, and prove we
can give you the best that
radio offers.
